

## **The “OB Challenge”**

In addition to the challenge of daily “survival”, we would like to respectfully challenge you to take a look at some **NEW, life-changing medical research**, and then consider joining with us to further improve this country’s prenatal nutrition program, coast-to-coast. The “challenge” is extended to all physicians interested.

### **The Process:**

1. Read the **“Abstract”** of **“Prenatal Nutrition Today, Findings & Recommendations”**.
2. **“Contact Us”** for:
  - A one-on-one, **personal conference call and Power Point presentation/discussion.**
  - A no-obligation evaluation of your present prenatal multivitamin.
  - A copy of our current report, **“Prenatal Nutrition Today, Findings & Recommendations”**.
  - Practical, medically-supported recommendations.

“Recapturing the passion for health care”
